SoCal Work Truck Show Fills Booming Demand For Commercial Vehicles

In Conjunction with OC International Auto Show

ANAHEIM, Calif. – (September 26, 2019) The SoCal Work Truck Show returns to the Anaheim Convention Center, Thursday, October 3 through Sunday, October 6, with more than 50 commercial work trucks and vans. The largest truck show on the West Coast, this is the place for small business owners to compare models from top manufacturers including Chevrolet, Ford, Fuso, Hino, Isuzu, Mercedes-Benz and Ram. From contractors to delivery services, highly customized trucks designed to fit all types of work needs will be on display along with manufacturer representatives and body companies to provide information and answer questions.

From an independent electrical contractor to a small plumbing company, this show within the show provides the unique opportunity for small business owners to see more than 50 commercial vehicles and talk directly to manufacturers and upfitters about their specific business needs. New this year, the Go Green, Drive Clean exhibit, sponsored by South Coast Air Quality Management District (SCAQMD), will display how SCAQMD is leading the way towards the expansion of near-zero and zero- emissions technologies and how we're helping fleets and businesses go green with millions of dollars in incentives!

“The SoCal Work Truck Show provides a rare opportunity for independent contractors and small business owners to explore custom work truck and van options in one place,” said Isuzu Commercial Truck of America Executive Marketing Director Brian Tabel. “While there are other events designed to reach the larger fleet operators, the SoCal Work Truck Show actually markets directly to commercial vehicle buyers to get them to the show in one of the largest commercial vehicle markets in North America.”

The show will focus on light to medium duty trucks in the Class I thru Class VI categories, several completely upfitted to showcase the endless possibilities available in today's marketplace. Attendees will get to see, touch and explore all that upfitters are capable of doing on a variety of vehicles, as well as how they can serve their specific business needs.
